Senior Analyst with 5+ years of experience in Python Development, Web Scraping, Automation, Data Engineering, and Data Analytics. Experienced in building scalable data extraction solutions, ETL workflows, API integrations, and enterprise automation systems. Databricks Certified Data Engineer Associate with expertise in Python, SQL, Databricks, Selenium, Playwright, and cloud-based data processing solutions, Monitoring & Learning Mobile Scraping

Technical Skills

Languages & Frameworks: Python 3, Flask

Data Engineering: Databricks, ETL Pipelines, Data Processing, Data Transformation, Data Validation

Web Scraping & Automation: Selenium, Playwright, Scrapy, Requests, BeautifulSoup, SeleniumBase, Pyppeteer XPath, CSS Selectors, API Integration, Proxy Management, CAPTCHA Handling, urllib2, Cfscrape, Cloudscrape

Testing & Debugging Tools: Unittest, PyTest, cURL, Postman, Charles Proxy

Data Analystics : NumPy, Pandas

Databases: MySQL, MongoDB, SQLite

APIs & Scraping Services: BrightdataUnblocker(API), Oxylabs(API), ScrapingBee (API), Scrapyfly (API)

Platforms & DevOps Tools: Databricks, Docker

Concepts: OOPs, Data Structures & Algorithms

Productivity Tools: MS Excel, MS PowerPoint, Ms Word.

IDEs & Editors: PyCharm, VS Code, Jupyter Notebook, Spyder, Sublime Text.

Version Control: Git, GitHub
Project & Workflow Management: JIRA, Asana

Mobile Scraping & Automation: Mobile Application Scraping, Android Debug Bridge (ADB), Android Device Management, Android Emulators, Mobile Application Inspection, Appium Server, Appium Inspector, scrcpy (Screen Mirroring), Mobile Automation & Debugging.

Mobile Testing & Development Tools: ADB Device Connectivity, Appium-Based Application Inspection, Emulator/Simulator-Based Testing, Mobile Application Monitoring.

Management Skills

Client Management, Team Leadership & Mentoring, Reporting & Documentation, Delivery Management

Work Experience

eClerx Services Limited, Pune

Analyst | Aug 2022 - Senior Analyst | Apr 2026
Senior Analyst | Apr 2026 - Present

UBER — Mobile Scraping | UNDERARMOUR & QUALCOMM — Web Scraping June 2026 - Present

UBER — Mobile Scraping Pilot Project

Contributing to an ongoing pilot project focused on **mobile application scraping**, technical exploration, monitoring, and solution development. Exploring and developing mobile data extraction approaches, including application inspection, device connectivity, and interaction with mobile application environments.

Working with Android Debug Bridge (ADB), Android emulators, simulators, Appium Server, and Appium Inspector to support mobile application inspection and automation workflows.

Using scrcpy for mobile screen mirroring and real-time application observation, along with MongoDB Compass for database inspection and data validation.

Supporting research, proof-of-concept development, troubleshooting, and continuous learning to evaluate mobile scraping approaches and technical feasibility.

UNDER ARMOUR & QUALCOMM — Web Scraping Development

Developed and enhanced Python-based web scraping scripts to extract relevant data from client-specific websites.
Implemented website-specific extraction logic using browser automation, HTML parsing, XPath, CSS selectors, and API integration, as applicable to project requirements.
Worked on scraping script development, debugging, and maintenance to address website changes and data extraction challenges.
Managed web scraping development activities in parallel with ongoing mobile scraping research and development for the Uber pilot project.

YIPITDATA Aug 2022 - June 2026

YipitData is in the business of providing data-driven insights to the world's largest hedge funds and corporations to help them gain a real competitive edge and provide better service to their customers. They have analysts which works on no. of websites & shares the data & analysis report to their client.

- Served as a Consultant for US and China-based analysts, providing solutions for website scraping and developing efficient, long-term crawling bots for data analysis.
- Created various crawling bots for clients, implementing techniques to bypass CAPTCHA challenges on tricky websites.

SPENDHOUND

Spendhound is a100% free software renewal platform and procurement service that helps companies save time and money renewing vendors.

- Developed code to retrieve user bills from applications like Sage-Intacct, Zoom, Coupa, and Xero by bridging targeted APIs and handling complex challenges.
- Created functionality to download various document types (PDF, DOCX, JPEG) for invoices and other billing data.

BYTOSOFT, Varanasi
Sep 2020 – Aug 2022

Developer

- Led end-to-end web scraping and data extraction projects using Python, Scrapy, Selenium, XPath, and automated ETL workflows.
- Developed and maintained scalable data processing solutions for XML, JSON, CSV, Excel, and database systems.
- Delivered web scraping solutions for major platforms including Amazon, Flipkart, Zomato, and other business-critical data sources.
- Contributed to SEO optimization, content development, client engagement, and web application support for multiple enterprise clients.
- Improved SEO, authored articles, maintained client relationships, and contributed to web development for sites like TheCenturyPlazaHotel, Gaming.games, and Basicsikshaparishad.

Engineer Point It Solution, Varanasi

Developer Aug 2019 - Aug 2020

- Gathered business requirements, prepared technical documentation, and provided client-facing technical support.
- Developed and maintained scalable data processing solutions for XML, JSON, CSV, Excel, and database systems.
- Authored web content and supported website maintenance, troubleshooting, and operational activities.

Education

A.K.T.U. LUCKNOW (Master Of Computer Applications) ***CGPA : 7.96(2016 – 2018)***

M.G.K.V.P. VARANASI (Bachelor Of Computer Applications) ***CGPA : 8.1(2013 – 2016)***

Project Work

• **Enterprise Web Scraping & Data Automation Solutions**
Designed, developed, and maintained large-scale web scraping and data extraction solutions using Python, Selenium, Playwright, BeautifulSoup, Requests, APIs, and proxy management. Delivered reliable data pipelines, anti-bot bypass mechanisms, and automated data collection workflows across multiple global e-commerce, retail, travel retail, automotive, and technology platforms.

Key Projects:
DelhiDutyFree, WorldDutyFree, Heinemann, iShopChangi, Adani One, Deribit, Amazon, Flipkart, Intersport, Lazada, Otto, Stadium, AutoZone, Costco, Wayfair, Wix, Spotify, Apple, Company LinkedIn Scraper, and various enterprise client projects.

Responsibilities:

- End-to-end scraper development and maintenance.
- Data extraction, transformation, and validation.
- Proxy integration and anti-bot handling.
- API integration and automation workflows.
- Performance optimization and production support.
- Troubleshooting and enhancement of existing scraping infrastructure.

• **Data Engineering & Analytics Solutions**
Developed scalable data processing workflows and ETL pipelines using Python, SQL, Databricks, and cloud-based data engineering technologies. Worked on data ingestion, transformation, validation, reporting, and automation initiatives to support business intelligence and analytics requirements.
• **SEO Content & Digital Marketing Projects**
Created SEO-optimized technical and business content for multiple organizations including Bytosoft, Vidhan News, News24, Rao IAS, The Century Plaza Hotel, SheetalRajputOfficial, Gaming.Games, and other digital platforms, contributing to improved search visibility and audience engagement.

Awards and Certificates

• **Promotion – eClerx (2026) :-** Promoted from Analyst to Senior Analyst in recognition of exceptional performance, technical expertise in Python, automation, web scraping, and data engineering, along with consistent delivery of high-impact business solutions.
• **Super Achiever Award – eClerx (2026)** :- Honored for demonstrating exceptional technical expertise in Python, web scraping, automation, and data engineering while delivering business-critical solutions. Recognized for execution excellence, cross-functional collaboration, innovation, and consistent delivery of high-value outcomes.
• **Databricks Data Engineer Associate (173263580)**
• **Databricks Data Analyst Associate (173431421)**
• **Databricks Certified Generative AI Engineer Associate (173529681)**
• **CEO Leadership Recognition – Bytosoft :-** Personally recognized by the CEO for successfully leading multiple strategic projects, demonstrating exceptional leadership, execution excellence, stakeholder management, and measurable business impact.
• **Advanced Bot Developer Certification** (RPA, RoboWorks)
• **Zero to Hero Python Certification** – Udemy
• **Digital Forensics Certification**
